Explore max amounts of data stored in elements max map sizes, bandwidth.			
Result summary			
Plenty of problems. Significant progressive slowdown with text > 10k. Less impact with siblings, icons. Some extra things observed.			

Perf clip up & running (cs.exe).

Known issues / situation:

- Large ^{image} files have problems. (FM...C)
- 35+ icons causes layer issue on node. (FM...A)
- Created & took windows with 1mb text inser.
- Created with 65k insert. (OK with > 1mb p.c?)

From
play
about
earlier.
not
restarted
or logged.

Process Explorer.

Screen use of (Shame!) + CPU monitor on.

XML file format so look -> file - just text?

Do in short bursts - allow thinking time
- allow machine deactivation.

Pediv xml, the open in MM?

More text files -> test directory for error/over.

Reproduce icons problem.

Start MM - crashes on open.

Because of playin with file earlier? possibly...

Remove USB. key

→ Have to reboot machine - can't get FM to start up... Starts, Glass Splash, State java, goes away.

? Where are the logs on this control box??

Gov is going - binned a corrupt file
It was going to default.

Some weeks pass!

70 mins left - saving software! At last!

Reproduce icons bug...

problem - see session.

After 10 mins of probs...

Sideways scroll with > 10 icons is poor

shp 05 - not doing it

~~can~~ reproduce - new child work

Dec - 37 with (?), !

Try old/empty code, send MM.

"Parr 3 icons own."

Still @ 37. - parr
sibling old/no
child. code.

→ Stop with this, can't think
of expln (although has found w/1 bugs).

45 mis left

Paul clip

Kaan: field length 37 icas (hard edge)

$N \pm 65$ R text (? progression?)
response.

? Use paul clip to try 1k

4. ctrl limits / data elements / sizes.

child / oblige

map size.

elements: controlled.

looked @ icas.
test.

Does test children - N350-450

children (1 min key down)

App becomes unresponsive

PE shows "Private bytes" close to 45 Mb.

? looks like max?

Finally can back!

Save + close - no open.

we - opening problem map of cowe.
↳ close it!

Tiny zoom.

Center chart
siblings

Map size.

Fiddling XML.

Out of time!

(of 12 days...).
