

Description	Look @ images.		Timestamp	29/1 11:58.	
Session ID		Test ID	FM000C-001	Tester	JAMES L
Estimated time	90 mins. (92 est 75)	Actual time	92	Time needed	180
				% complete	50%
Charter	Explore insertion ingr of various formats → FM map. rang: Type, size, resolution, insertion point, multiplier. (+etc.)				
Result summary	Some problems around size (? corruption?). DPI not handled, or zoom. Sunday usability bugs. Stylized by zoom problem, & validity of image-related issues.				

Got: BMP
JPG
TIFF
GIF
PNG

@ various size + res.

- MM: pic as? Click help. → Not picture.
- ① Graphical link - ?
 - ② Drop-it
 - ③ Paste in
 - ④ XML change? → Alt+K, context insert
- MM: edit pic
paste
change loc after
- ⑤ Scan?
- ⑥ Export
- YES! "Picture inserted as picture feature".
PNG, JPG, GIF
!! BMP not supp...

Find: only finds from currently-selected code.

odd msg Step 1 12:05.

Some examples - interesting. Foldy
Alt+K

Valid type.

! No map tabs old user.

! Close seems to close up.

Must save before look

? What if path "too long"?

160x120 ok.

Known: ! No ^{size change} ~~1200~~ in / out

! Can issue "on the top"

→ Delete - becomes small...

!! DPI doesn't seem to matter.

! User always wants to ^{path} root of .mm doc

? Export as .pdf to have a look?

• [] ?

→ Neither work.

Redraw mm.

Maybe another BB probs...

- Paved.... ok.

So: BBTA causes probs ~ 30 min it??

Pre-pro.

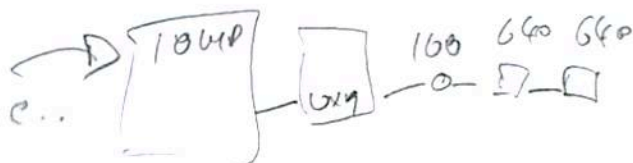

! Don't export.

! Don't send to big pic...

— But has before...

— Pic given... Has "broken" icon.

Re-entire... ~~BBTA~~ No change

Re-inserted - Still broken

(2)

New map. Still broken...

Spic broken?

Start Fire - 3m - pause.

Pic ck. for FFv.

DPT.

!! Always gas test map

→ And don't close, closer should be

→ May (if opened map covers photo) result in
anyway bugs

→ Collect new map before starting old,

then close + no. given should be

What a pain

Don't VPG - men.

WJ - Alt + K

ping - drop it + connect

→ Pak 50

Can pick up + drop. Child level.

ping transparent walls.

multiple fence walls. - 5m K fill due

Challenges.

Png - slow, the A/k+k.

- lots of CPU

JPG & GIF appear but

open in other way?

Still busy

Insert images over

JPG → centre of the gif... lots of CPU, finally
opens.

? Disk space issue?? All auto / low disk

! Since ^{10MP} ~~IPG~~ ~~save~~ 10MP Gifs
work.

!! 10MP IPG now corrupt...

Note: is filename XML...

↳ Drop page → menu.

Did it save & save over
